

**Modular Offsite Manufacturing
and pods**

Leading Provider of Innovative Life Science Facilities

KeyPlants is best in rapidly providing sustainable and high-quality turnkey design and capital projects for the life science industry by breaking down complexities into standardised solutions that deliver flexibility and safety for its clients.

Are you thinking of expanding your production?

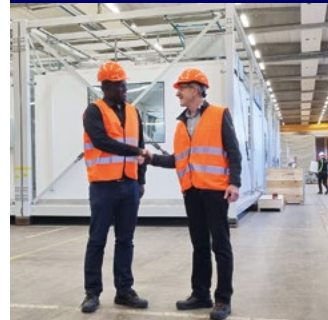

Or launching a new product?

At KeyPlants, we have decades of experience building modular, turnkey facilities for the world's leading pharmaceutical and biotech companies.

Our modular agile design solutions meet the demanding requirements of today's business needs in the production of therapeutics.

And by deploying standardised, repeatable solutions globally, you can reduce variability from project to project, and reduce both cost and schedule, from the design process to fabrication and startup.

It's why so many companies choose KeyPlants for their facility projects.

Advantages of Modular Offsite Manufacturing

- Shorter time to market
- Manufacturing under controlled conditions
- Increased predictability in cost, schedule and quality
- Increased safety and sustainability
- Less disturbance of site operations
- The facility can easily be expanded and moved

Types of Modular Facilities

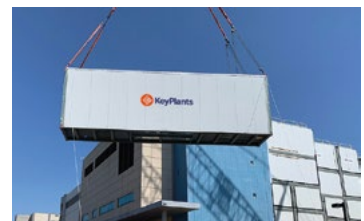

Pods

- Portable on demand clean rooms
- Standard Sizes

Internal Modules "Box-in-Box"

- Process integrated and self-contained
- Installed within a shell building

Modular Buildings

- Process integrated and self-contained
- Environmental closure

Turnkey Delivery of your Capital Project

- Project definition and front-end studies
- Project Management, design and engineering and procurement
- Prefabrication, site construction and installation
- Start-up, commissioning and qualification
- After sales support and services

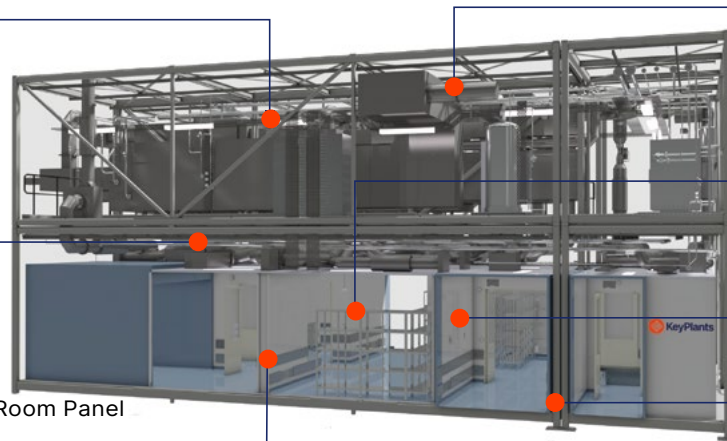

Complete Modular Facility

Preinstalled Air Handling Units, Ducting Piping and Electrical Installations

Walkable Ceiling and floor track system for ease of future re-configuration

Clean-Room Panel

Sandwich panels as facades are used on all kind of buildings modular as well as conventional concrete and steel

Robust design with steel frame

- Stackable
- Easy to move with equipment installed

Equipment installed in workshop

With airlocks for personnel and material respectively

HVAC control & door interlocks

ISO Certified Manufacturing Workshop

- ISO 9001 and ISO 14001 certified workshop in Sweden
- 50.000m² total area
- Outstanding Safety Record with 85%+ of your facility built in our workshop

KeyPlants offsite manufacturing and pods lower cost and risk, while increasing predictability, quality, safety and speed.

Your Solution-Orientated Partner

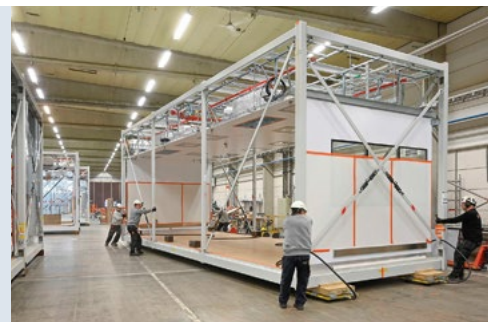

KeyPlants is a leading international industry partner for standardized pods and customized process-integrated modular prefabricated facility solutions, with experience from having supplied over 4,500 high-specification modules worldwide.

We have successfully executed complex projects on a global scale. Additionally, we offer our customers an unmatched understanding of pharmaceutical process engineering and automation, covering biomanufacturing, aseptic filling, containment, and manufacturing of APIs and oral solids.

This combination makes KeyPlants your ideal partner.

We deliver high-quality capital projects and tailored solutions to accelerate your project development with speed, flexibility, and predictability.

We serve a global customer base ranging from emerging biotech to big pharma.
